Story County, along with ten (10) other counties in Central Iowa, is participating in a study to determine the availability of adequate and affordable broadband service throughout our county.

An important part of this study is a survey of Story County residents and businesses. The deadline for the Story County broadband coverage survey has been extended to May 14. The extension will not only help increase responses, but broaden the range of responses. The goal for survey responses is to have responses from all intersections of our community and to ensure that there is ample opportunity to engage diverse, low-income, senior, rural, urban,

and every other demographic. We are also encouraging those who may have broadband and are satisfied with their service to still take the survey. Their responses will help us identify gaps and areas of focus for future efforts. Their responses also provide insight into the affordability of service. The survey can be accessed on the website for the Greater Des Moines Partnership (Central Iowa Broadband Internet Survey), which is coordinating the study. There are two separate survey links:

The Pfizer COVID vaccine is now approved for 16-year-olds. Story County Public Health is sending out this survey to see if high schoolers and their families have an interest in getting the vaccine. The survey results will help Story County Public Health determine what type of vaccine clinic to provide. The survey takes less than five minutes and should be completed by May 1.
